DISCLAIMER

The information contained in this document is based upon data retrieved remotely from a Communication Server. Some of the information presented may be derived, in whole or in part, from this data. Inconsistent and/or incorrect programming of the Communication Server may cause these derivations to be inaccurate. For the sake of consistency in these reports, there may be cases in which a best-effort attempt is made to derive particular information based upon related data in the Communication Server. As the reporting facilities of the Communication Server's hardware and software improve, the enhanced data will lead to more accurate InfoPlus reports. Technical errors encountered during the remote transfer of data from the Communication Server may cause spurious results in the report. Bristol Capital, Inc. does not guarantee the accuracy of the information presented, although reasonable attempts have been and will continue to be made to ensure InfoPlus reports are as accurate as possible.

This report and the information contained herein is to be used only for the purposes intended. Any disclosure of the information contained herein to parties other than the subscriber of this service, or the organization whose information is represented, is strictly prohibited.

Communications Management with InfoPlus

Regardless of the size or type of organization, there are a few basic concerns of every communications manager. InfoPlus services help address those various concerns through an integrated suite of reports and analyses.

Configuration
Performance
Security
Backup

Configuration – This document, the InfoPlus SourceBook, details how a system’s software is programmed to meet your organization’s needs. The many details of system programming are laid out in understandable formats, including graphics of each set and even each button’s feature or line assignment. Commonly needed but difficult to obtain information, such as call routing information, is clearly presented in easily understood reports, such as our Calling Privileges report. The SourceBook is an excellent tool for the day-to-day management and administration of a communications system, ensuring uniformity and adherence to current design policies.

A next logical step in gaining additional control over your telecommunications resources might be an InfoPlus Security Audit. While the SourceBook details the general programming of your system, the Security Audit is an extensive analysis of how that programming might be leaving the organization susceptible to internal or external abuse. More than just potential cost avoidance, the Security Audit makes specific recommendations to help limit your system to only intended use.

Other services in the InfoPlus suite include:

Inventory – InfoPlus Site Survey

- Inventory of the major Communication Server hardware and software components
- Factory Support analysis pinpoints “End-of-Life” and other unsupported equipment
- Access to database for enterprise customers

Performance – InfoPlus Traffic Study

- Consultative Report, not a “data dump”
- Supported by graphical representation of the “important” data
- Analyzes Networks, Trunks, Consoles and even Processors
- Clear recommendations for improving service

Security – InfoPlus Security Audit

- Detailed, computerized review of the system’s programming
- Analyses of 83 separate features with security implications
- Each analysis consists of a feature description, the security concerns and recommended changes in programming
- One hour of personal consultation is included

Backup – InfoPlus Backup Service

- Off-site backup of your Communication Server’s configuration
- Available at any time for restoration through the Internet

Please contact your telecommunications vendor for additional information about these services.

Conventions Used In This Document

Three of the reports in the SourceBook (Route Lists, Calling Privileges, and Action Items) describe capabilities based upon Area Codes. For the purpose of clarity and brevity, we have grouped Area Codes into States, Regions and Areas. If all of the Area Codes within a State or Region are included within a given report, we will indicate the largest area served. For example, both Oregon and Washington are in the Pacific Northwest. If all of the Area Codes in both of these states are included, we will indicate 'Pacific Northwest'.

Below is our definition for each of the regions used:

Region	States and Regions Included
Northeast	Connecticut, Hew Hampshire, Maine, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont
Mid-Atlantic	Delaware, Maryland, Virginia, West Virginia, and Washington D.C.
Southeast	Florida, Georgia, North Carolina, and South Carolina
East Coast	Mid-Atlantic, Northeast, and Southeast
Midwest	Illinois, Indiana, Kentucky, Michigan, Ohio, and Wisconsin
South Central	Alabama, Arkansas, Louisiana, Mississippi, and Tennessee
Plain States	Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota
Southwest	Arizona, New Mexico, Oklahoma, and Texas
Central States	Arkansas, Illinois, Louisiana, Oklahoma, Plain States, Texas, and Wisconsin
Northwest	Idaho and Montana
Mountain	Colorado, Utah, and Wyoming
Pacific Northwest	Oregon and Washington
West Coast	California and Pacific Northwest
West	Arizona, Mountain, New Mexico, Nevada, Northwest, and West Coast

1. Station Information

The Station Information section presents the configuration of the station side of the Communication Server. This includes a graphical display of each set defined for this customer, and descriptions of the individual Call Pickup and Intercom groups. Additional topics cover the configuration of speed call lists and ACD queues.

1.1. Station Templates

Format

This section presents an image of each set defined for this customer in the Communication Server. Graphics of all telephone instruments are in extension number order, and indicate the features of that station.

Use

Use this section to discuss changes with users and to prepare service or repair orders. The graphics provide a common reference point for all parties. For example, programming for button features and appearances may be verified before calling the vendor for repair of a trouble, or for requesting changes.

The amount of time it takes a technician to perform changes will be drastically reduced by consulting the telephone set graphic prior to placing a work order. Telling the technician to add extension 4321 to Call Pickup Group 7 is much more efficient (2 minutes) than telling the technician to add Alice Pedone to the same Call Pickup Group Sue Graham is in (30 minutes).

Common Key Feature Codes

ADL - Autodial	AO3,6 - 3/6 Party Conference	CFW - Call Forward
CHG - Charge Account	CWT - Call Waiting	DIG - Dial Intercom
GPU - Group Pickup	GRC - Group Call	HOT - Hotline
LNK - Last Number Redial	MCK - Message Cancel	MIK - Message Indication Key
MSB - Make Busy	MWK - Message Waiting	PRK - Call Park
PRS - Privacy Release	PVN - Private Line Non-ringing	PVR - Private Line Ringing
RDL - Redial	RGA - Ring Again	RLS - Release
RNP - Call Pickup	SCC - Speed Call Controller	SCU - Speed Call User
SIG - Signal	SSC - System Speed Call Controller	SSU - System Speed Call User
TRN - Transfer	VCC - Voice Call	

Lines appearances that ring on a set are indicated with a triangle icon in the LCD area. If the key does not have an associated LCD strip, the extension number is drawn in a **bold** font to indicate a ringing appearance.

Preparing Repair & Service Orders

This section can be a powerful tool in the verification and reporting of repair troubles, and in the placement of complete service orders. Its use will improve service and communications between you, your users, and your vendor.

Before reporting troubles such as specific features or keys not working, this section should be consulted to determine if the feature is programmed on the reporting set, or if the correct key is being addressed. Remember, the user only sees what is written on the key cap which may be incorrect - you are seeing the programming in the Communication Server.

In preparing service orders, we suggest making a copy of the set to be worked on, and using that copy as both a means to communicate with your users, and as a document to place service orders with your vendor. Cross out those items that need to be changed and write in the changes you want to make. You can even use the book to assign your own Intercom and Call Pickup Groups; the Communication Server does not have a utility that would allow a technician to find the next spare group easily.

Did You Know?

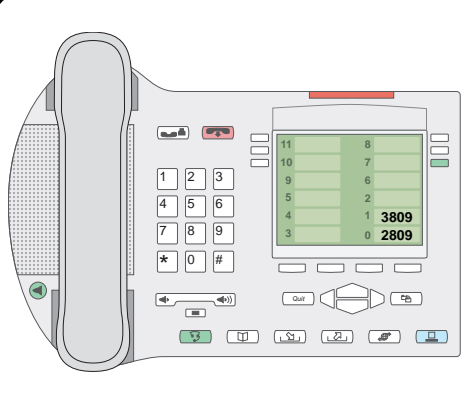

If you make frequent changes to your stations, or need a superior way to place service requests, you may wish to upgrade to our GuardianService program. GuardianService provides automatic periodic updates of the SourceBook in electronic format ensuring accurate information, and also performs a Backup of your system data to a remote secure server. See your sales representative to learn about the other major benefits of GuardianService.

1.2. Call Pickup Groups

This section contains listings of all stations that share the same Call Pickup Group.

Format

The section is organized by Call Pickup Group, and then by extension number within the Group.

We have purposefully omitted more technical information (such as TN and DES) from this report to avoid confusion should these reports be distributed to your users.

Use

This information may be distributed to each member of each Group so they may have an accurate listing of members in their Call Pickup Group.

Call Pickup Groups that have only one station assigned are listed in the Action Items section as items which may be cleaned up.

Call Pickup Group: 1

Stations in this Call Pickup Group:

Extension	Name
2804	Clarence Anderson
2809	Stanley Jackson
2810	Travis White
2813	Bradley Thompson
2814	Francisco Garcia
2820	Brad Lee
2821	Claude Walker
2823	Amanda Allen
2824	Frances Young
2825	Diane Hernandez
2826	Heather King
2830	Joan Lopez
2833	Diana Hill

1.3. Intercom Directories

This section contains listings of all stations that share the same Dial Intercom Group.

Format

This section is organized by Intercom Group, and then by extension number within the Group. The right most column provides the Dial Code for each member of the Intercom Group.

We have purposefully omitted more technical information (such as TN and DES) from this report to avoid confusion should these reports be distributed to your users.

Use

This information may be distributed to each member of each Group so they may have an accurate directory of their Dial Intercom Group.

Intercom Groups which have only one station assigned are listed in the Action Items section as items which may be cleaned up.

Dial Intercom Group: 1

Stations in this Dial Intercom Group:

Extension	Name	Dial Code
2828	Jean Wright	05
2850	Peter McLaughlin	04
2935	Robin Howard	02
2977	Zachary Wood	03
3160	Kathleen Holloway	06
3164	Kathryn Logan	01
3180	Douglas Morton	07
Total Members in Group: 7		

Dial Intercom Group: 2

Stations in this Dial Intercom Group:

Extension	Name	Dial Code
2818	Duane Rodriguez	04
2903	Stacey Stewart	05
2915	Robert Reed	01
2946	Victor Brooks	02
5505	Nicole Perry	03
Total Members in Group: 5		

Dial Intercom Group: 3

Stations in this Dial Intercom Group:

Extension	Name	Dial Code
2942	Ruth McCormick	01
Total Members in Group: 1		

Dial Intercom Group: 4

Stations in this Dial Intercom Group:

Extension	Name	Dial Code
2811	Chad Harris	04
2823	Amanda Allen	02
2944	Jack James	03
3168	Katie Drake	01
Total Members in Group: 4		

Dial Intercom Group: 5

Stations in this Dial Intercom Group:

Extension	Name	Dial Code
2934	Ruby Cox	01
Total Members in Group: 1		

1.4. Station Speed Call

Station Speed Call provides station users the ability to dial frequently called telephone numbers using a 1 to 3 digit code.

Format

This section contains a listing of all stations that have been programmed for Station Speed Call capabilities. It is sorted by Station Speed Call list number, then by extension for stations sharing the same list. Extensions noted with a ✓ in the 'Controller' column have the ability to add to or modify the Speed Call list. We also provide each station's DES (usually indicating the station's location), Equipment (TN), and set type.

Use

Speed Call lists consume valuable system memory. You will be able to conserve memory by reducing the number of lists. Employees who have shared responsibilities may be able to share a common Station Speed Call list as opposed to having individual lists, thus saving memory.

For the purpose of uniformity, this report should be consulted when establishing new Station Speed Call lists in order to easily determine the next available Station Speed Call list number.

List	Controller	Name	Extension	DES	Equipment	Type
0002		Claude Walker	2821	FL3J08	064 0 03 15	2004P2
0002	✓	Charlene Sanchez	2904	FL2J17	064 0 01 03	2004P2
0002	✓	Rachel Powell	5520	FL2J02	008 0 07 08	3904
0002		Laurie Carson	5530	FL2J36	064 0 03 03	1220
0002		Michele Flores	5545	FL1J16	008 0 07 06	3903
0003		Robin Howard	2935	FL1J27	064 0 01 14	2004P2
0003		Richard Ramirez	2943	FL3J21	064 0 02 05	1230
0006		Clarence Anderson	2804	FL2J49	064 0 02 21	2210
0006		Antonio French	2852	FL3J04	064 0 01 30	1210
0006	✓	Nicholas Watson	2945	FL3J27	064 0 02 07	2004P2
0006		Kevin Tran	5553	FL3J03	064 0 01 19	1230
Total number of Station Speed Call users: 11						

1.5. System Speed Call

System Speed Call gives station users access to a System Speed Call list allowing them to dial frequently called telephone numbers using a 1 to 3 digit code. System Speed Call also overrides any restrictions placed on an extension. Thus, even a fully restricted station can reach a distant office if the distant office's telephone number is placed on the System Speed Call list.

Format

This report contains listings of all stations that have been programmed for access to the same System Speed Call list. Each listing is sorted by extension number. Extensions noted with a ✓ in the 'Controller' column have the ability to add to or modify the Speed Call List. Following each list, we also provide the telephone numbers programmed for each code within the list, and a space you may use to identify the number.

Use

System Speed Call numbers are not limited by a station's Network Class of Service. As a consequence, they are an important tool for providing extended calling privileges to stations with limited NCOS. Use this report to ensure that all stations that should have access to the System Speed Call feature are correctly programmed.

You may also wish to distribute the Codes and Numbers to each member of a System Speed Call list for reference and updating purposes.

Did You Know?

As System Speed Call overrides a station's restriction, you may wish to verify these assignments for appropriateness. The InfoPlus Security Audit investigates and analyzes this and 82 other configurations to help identify and block unintended use or access.

System Speed Call List: 0000

1.6. ACD Groups

This section identifies the Automatic Call Distribution (ACD) Groups that exist within your system.

Format

For each ACD Group defined for this customer, we identify the associated agents noting Supervisory positions with a ✓ in the 'Supervisor' column. To the extent possible, we also note those Routes that may be dedicated to the ACD Group including RAN routes, Music Routes, and others by virtue of their instructions to auto-terminate at the ACD Group number. We also note any CDNs pointed to each ACD Group along with their associated RAN and Music settings.

Use

The report may be used to identify ACD Group sizing, and the Routes that may be associated with each Group.

ACD Group: 3050

Maximum Positions: 12

Night Call Forward: 92014760600

Observe Tone: No Observe Tone

There are no trunks that auto-terminate at this ACD Group.

There are no CDNs that are pointing to this ACD Group.

ACD Agents in this group:

Name	Supervisor	Agent ID	DES	Equipment	Type
Kathleen Holloway		3160	ACD01	004 0 03 00	3905
Catherine Brock		3161	ACD02	004 0 03 01	3905
Katherine Poole	✓	3162	ACD03	004 0 03 02	3905
Kathy Frank		3163	ACD04	004 0 03 03	3905
Kathryn Logan		3164	ACD05	004 0 03 04	2616
Rita Owen		3165	ACD06	004 0 03 05	2616

2. Directories

This section of the SourceBook contains directories of the users defined for this customer in multiple formats for easy reference. Listings are provided sorted by Name, Extension, and DES - allowing you to cross-reference information in the Communication Server regardless of the piece of information you know.

2.1. Extension Directory

This section presents a listing of all extensions defined for this customer.

Format

This section is organized in numerical order, by extension. Should the extension number be a PDN (appearing either on Key 0 of a multi-button set or on a single line set), it is so noted. Additionally, extensions that have more than one appearance are also noted.

Use

When disconnecting instruments, this section may be consulted to determine if any extension number appearing on the set to be removed has other appearances that may be affected.

2.2. Alphabetical Directory

The Communication Server has the ability to store and display names associated with extension numbers. This section presents a directory of all names defined for this customer.

Format

This section is organized in alphabetical order by name. For each name defined for this customer, we display the associated extension number and details about the station for which the extension is a Prime DN. If there is not a unique station for which the extension is a Prime DN, we show details for the station on which the extension is MARPed.

Use

This directory allows you to determine information about station programming when all you know is the name of the user.

Alphabetical Directory

Name	Extension	TN	DES	Type

2.3. DES Directory

Each station in your system may optionally be assigned a freeform identifier called a DES. The DES is typically used to indicate the location of the set within the premises. As the system does not force any constraints on the format, the DES reflects exactly what the technician typed.

Format

The entries in the directory are sorted by the DES field. TNs with identical DES identifiers are then sorted by extension number, and if necessary TN.

Use

A uniform format of the DES field will greatly aid in locating stations within the system, thereby reducing the time and expense of subsequent telephone work, either installation or repair.

DES Directory

2.4. MARP Directory

Each station DN within a customer has a Multiple Appearance Redirection Prime (MARP) assignment on exactly one multi-line station key or analog station DN prompt. The station with the MARP assigned to it will be in control of hunting and forwarding treatments for calls to that extension (DN).

Format

This section is organized in numerical order, by extension. Along with each extension listed is the associated device that has been assigned the MARP. For digital stations, the key with the MARP designation is also shown.

Use

This report may be used to troubleshoot or theorize call treatments in busy or no answer scenarios.

MARP Directory

2.5. Phantom DN Directory

This section lists all Phantom DNs defined for this customer with their related call forwarding and identification information.

Format

This section is organized in numerical order, by extension. For each Phantom DN, the programming details of applicable call forwarding features (DCFW, CFW, FDN, and CFXA) and identification information (TN, Name, and DES) are listed. A ✓ in the CFXA column indicates that the 'Call Forward All Calls to External DN' feature is allowed, meaning the Phantom DN could be forwarded to an external destination.

Use

This section may be referenced as an inventory of Phantom DNs and their related configuration parameters. It is especially useful to ensure the forwarding destinations of Phantom DNs are accurate, and the 'Call Forward All Calls to External DN' feature (CFXD/CFXA) is only used when necessary.

Phantom DN Directory

Ext.	DCFW	CFW	FDN	CFXA	TN	Name	DES
5527	2999	3075		✓	068 0 01 00	Phantom Forward	FWD
5528	3050			✓	068 0 01 01	Phantom Forward	FWD
5529	3075	3050			068 0 01 02	Phantom Forward	FWD
Number of Phantom DNs Listed: 3							

2.6. Universal Extension Directory

Universal Extensions allow the use of SIP Line clients, mobile phones and other devices to operate in parallel with or in place of your office phone. Calls to and from such devices are indistinguishable from an employee's desk phone. Common operations such as call transfer and conferencing can be performed from the mobile device providing seamless interaction with an employee's desk phone or other office phones.

Format

Each Universal Extension defined for this customer is listed and grouped with any TNs that share its Primary DN (PDN). Each extension is listed once at the start of its group. The shared DN is listed in the left most column as Extension and will span the rows of TNs that are in its group. Listed to the right of that is information that is pertinent to the administration of UEXTs. CLID is the UXID prompt in the UEXT's TNB. It is the calling line ID of the device associated with the UEXT. The Forwarding column displays the digits necessary to dial the associated device and is the HOT P or HOT U number from the UEXT's TNB.

Use

This section should be referenced to aid the administration and maintenance of Universal Extensions. From this section you will be able to determine which users have their extensions forked to a Universal Extension. You will know their names, the phone number to which calls are forked, and what resource they relate to within the Communication Server.

3. Trunking Information

Whereas the previous sections of the SourceBook have dealt mainly with the programming of the stations in the Communication Server, this section addresses topics related to trunking. Included is an analysis of how the trunking facilities of the Communication Server are grouped, and what access to those facilities your users have.

3.1. Routes

A Route is a grouping of similar Trunks performing an identical purpose. For example, all DID Trunks for the main telephone number would be part of a single Route.

Format

This section is organized by Route number, with the left most column of each report reflecting the Member number within the Route.

System software of Generic 11, Release 19 and later also provide for the entering of Trunk ID (TKID) information that, if entered, is listed in the 'Circuit ID' column.

In older Releases, Route 31 may be a special Route that contains all Trunks that terminate directly on buttons of specific telephone sets. All other Routes can serve a multitude of purposes.

Use

The Route reports give you a quick listing of the number of Trunks associated with each Route, along with their associated Circuit IDs. We would suggest that your technician provide you with the actual circuit numbers associated with each member in the Route, and its associated RJ21X jack and pin number. This will greatly aid in resolving telephone company repair problems.

You may also use these reports to verify the 'Grading' of your system. Ideally, Trunks within a Route should be spread over all available Equipment so that failure of any one card would not affect an entire Route, but would minimally impact several Routes. There is no way to protect against this type of failure for circuits associated with a T-1.

Did You Know?

While this section of the SourceBook will tell you the number of trunks in each Route, only the InfoPlus Traffic Study will help you determine whether you have too many or too few to meet your business needs. Too many trunks and you're wasting money. Too few and you're hindering business. An annual review of trunking requirements is one of the five components of prudent communications management. Call your salesperson to arrange for an InfoPlus Traffic Study to begin next week.

Special Prefix Number (SPRE)

The Special Prefix Number can be used by a technician to seize a specific trunk for testing purposes.

Special Prefix Number (SPRE): 27

The following maintenance telephones were detected in this Communication Server:

3.2. Route Lists

Route Lists define the Routes to be used when calling specific Area Codes, as well as the Network Classes of Service (NCOS) that may have access to the Routes.

Format

This report is organized in numerical Route List order.

Use

This report may be used to verify the design of the Basic Automatic Route Selection (BARS) system. First, the Area Codes assigned to each Route List are presented, along with a description of the geographic region covered by those Area Codes. We then list the Routes to be used in completing calls to the identified Area Codes. For each Route, we list its Route Number (as identified in the Routes section), the type of trunk and the Network Classes of Service (NCOS) that have access to that Route.

Consistency in calling privileges may be checked by matching the Network Classes of Service against other Route Lists.

As new Area Codes are added, they may be easily matched to existing Route Lists instead of creating a new Route List.

An overall communications objective would be to have the fewest number of Route Lists that meet the call processing needs of the organization.

Did You Know?

The InfoPlus Security Audit performs an in-depth review of all Route Lists from a security perspective. This is but one of 83 separate analyses performed in the Security Audit. Performing annual audits is the best way to ensure your system design thwarts unintended use and access.

Route List: 1

This Route List serves the following Area Codes:

281, 713, 800, 832, 866, 877, 888, 936

These Area Codes cover the following geographic region(s):

Some of Texas, some of Toll-Free Area Codes.

3.3. Calling Privileges

This section summarizes the Calling Privileges of each station defined for this customer. Calling Privileges are a combination of each station's Class of Service (CLS), Network Class of Service (NCOS) and Trunk Group Access Restriction (TGAR). This information is then matched against each Route and Facility Restriction Level (FRL) in each Route List to determine the station's capabilities.

Format

This section is organized into groups of Calling Privileges as determined by a station's CLS, NCOS and TGAR assignments. For each Privilege Group, we summarize the calling abilities and identify the geographic areas that may be called. We then identify, in numerical order by extension, all stations having those abilities. Along with the extension number we provide the name, the DES (usually indicating the station's location), the equipment (TN), and the set type.

Use

Use this section to review overall Calling Privileges, and to assess the appropriateness of each station's assignment. You may also use the section as an aid when assigning a new station's call capabilities by first identifying the capabilities desired, and then matching the new station's CLS, NCOS and TGAR to the values noted for the correct Privilege Group.

Did You Know?

In the establishment of Calling Privileges, security guidelines may have been violated. An InfoPlus Security Audit will help you assess Communication Server programming from a security perspective. In the audit, stations whose calling abilities are extensive are highlighted for review.

Privilege Group 1

The members of this Privilege Group share the following parameters:

Class of Service: CTD
Network Class of Service (NCOS): 0
Facility Restriction Level (FRL): 0
Trunk Group Access Restriction (TGAR): 1

Below is a description of the calling privileges the members of this Privilege Group have:

Calling Abilities

Conditionally Toll-Denied - Allowed to originate and receive internal calls, and to receive calls from the exchange network. Unrestricted for toll calls placed through Basic/Network Alternate Route Selection (BARS/NARS), but toll-denied for calls placed via direct access to trunks.

Direct Access

The members of this Privilege Group can access the following Routes directly by dialing their access code:

Route	Type	Code
0	DID	2020
1	COT	2996
Number of directly accessible Routes: 2		

Calling Areas

The following Area Codes can be dialed by this Privilege Group through BARS/NARS:

201

These Area Codes cover the following geographic region(s):

Some of New Jersey.

The following TNs are members of this Privilege Group:

Total number of members in this Privilege Group: 61				

Privilege Group 2

The members of this Privilege Group share the following parameters:

Class of Service: CTD

Network Class of Service (NCOS): 4

Facility Restriction Level (FRL): 4

Trunk Group Access Restriction (TGAR): 9

Below is a description of the calling privileges the members of this Privilege Group have:

Calling Abilities

Conditionally Toll-Denied - Allowed to originate and receive internal calls, and to receive calls from the exchange network. Unrestricted for toll calls placed through Basic/Network Alternate Route Selection (BARS/NARS), but toll-denied for calls placed via direct access to trunks.

Direct Access

The members of this Privilege Group can access the following Routes directly by dialing their access code:

Route	Type	Code
0	DID	2020
1	COT	2996
Number of directly accessible Routes: 2		

Calling Areas

The following Area Codes can be dialed by this Privilege Group through BARS/NARS:

201, 281, 713, 800, 832, 866, 877, 888, 936

These Area Codes cover the following geographic region(s):

Some of New Jersey, some of Texas, some of Toll-Free Area Codes.

The following TNs are members of this Privilege Group:

Name	Extension	DES	Equipment	Type
Stacey Stewart	2903	FL2J22	064 0 01 02	1110
Claudia Rogers	2912	FL2J30	064 0 01 04	1120
Total number of members in this Privilege Group: 2				

Privilege Group 3

The members of this Privilege Group share the following parameters:

Class of Service: CTD

Network Class of Service (NCOS): 5

Facility Restriction Level (FRL): 5

Trunk Group Access Restriction (TGAR): 1

Below is a description of the calling privileges the members of this Privilege Group have:

Calling Abilities

Conditionally Toll-Denied - Allowed to originate and receive internal calls, and to receive calls from the exchange network. Unrestricted for toll calls placed through Basic/Network Alternate Route Selection (BARS/NARS), but toll-denied for calls placed via direct access to trunks.

Direct Access

The members of this Privilege Group can access the following Routes directly by dialing their access code:

Route	Type	Code
0	DID	2020
1	COT	2996
Number of directly accessible Routes: 2		

Calling Areas

The following Area Codes can be dialed by this Privilege Group through BARS/NARS:

200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 425, 426, 427, 428, 429, 431, 433, 434, 435, 436, 437, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 469, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 704, 705, 706, 707, 708, 709, 710, 712, 713, 714, 715, 716, 717, 718, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 948, 949, 950, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999

These Area Codes cover the following geographic region(s):

Northwest, Plain States, Alabama, Alaska, Alberta, Anguilla, Antigua, Arizona, Arkansas, Bahamas, Barbados, Bermuda, British Columbia, British Virgin Is, Cayman Is, Delaware, Dominica, Guam, Hawaii, High-Toll Area Codes, Illinois, Jamaica, Kentucky, Louisiana, Maine, Manitoba, Maryland, Massachusetts, Montserrat, Nevada, New Brunswick, New Hampshire, New Jersey, New Mexico, New York, Newfoundland, Non-Geographic Canadian Area Codes, North Carolina, Northern Mariana Is, Nova Scotia, Ohio, Oklahoma, Pennsylvania, Puerto Rico, Rhode Island, Saskatchewan, South Carolina, St. Kitts & Nevis, St. Lucia, St. Vincent, Tennessee, Toll-Free Area Codes, Trinidad & Tobago, Turks & Caicos Is, US Virgin Is, Utah, Vermont, Washington, Washington DC, West Virginia, Wisconsin, Wyoming, Yukon & NW Terr., some of California, some of Colorado, some of Connecticut, some of Dominican Republic, some of Florida, some of Georgia, some of Indiana, some of Michigan, some of Mississippi, some of Ontario, some of Oregon, some of Quebec, some of Special-Use Area Codes, some of Texas, some of Virginia.

Privilege Group 4

The members of this Privilege Group share the following parameters:

Class of Service: CTD

Network Class of Service (NCOS): 5

Facility Restriction Level (FRL): 5

Trunk Group Access Restriction (TGAR): 2

Below is a description of the calling privileges the members of this Privilege Group have:

Calling Abilities

Conditionally Toll-Denied - Allowed to originate and receive internal calls, and to receive calls from the exchange network. Unrestricted for toll calls placed through Basic/Network Alternate Route Selection (BARS/NARS), but toll-denied for calls placed via direct access to trunks.

Direct Access

The members of this Privilege Group can access the following Routes directly by dialing their access code:

Route	Type	Code
0	DID	2020
1	COT	2996
3	TIE	10106
112	TIE	80112

Number of directly accessible Routes: 4

Calling Areas

The following Area Codes can be dialed by this Privilege Group through BARS/NARS:

200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 425, 426, 427, 428, 429, 431, 433, 434, 435, 436, 437, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 469, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674,

These Area Codes cover the following geographic region(s):

Northwest, Plain States, Alabama, Alaska, Alberta, Anguilla, Antigua, Arizona, Arkansas, Bahamas, Barbados, Bermuda, British Columbia, British Virgin Is, Cayman Is, Delaware, Dominica, Guam, Hawaii, High-Toll Area Codes, Illinois, Jamaica, Kentucky, Louisiana, Maine, Manitoba, Maryland, Massachusetts, Montserrat, Nevada, New Brunswick, New Hampshire, New Jersey, New Mexico, New York, Newfoundland, Non-Geographic Canadian Area Codes, North Carolina, Northern Mariana Is, Nova Scotia, Ohio, Oklahoma, Pennsylvania, Puerto Rico, Rhode Island, Saskatchewan, South Carolina, St. Kitts & Nevis, St. Lucia, St. Vincent, Tennessee, Toll-Free Area Codes, Trinidad & Tobago, Turks & Caicos Is, US Virgin Is, Utah, Vermont, Washington, Washington DC, West Virginia, Wisconsin, Wyoming, Yukon & NW Terr., some of California, some of Colorado, some of Connecticut, some of Dominican Republic, some of Florida, some of Georgia, some of Indiana, some of Michigan, some of Mississippi, some of Ontario, some of Oregon, some of Quebec, some of Special-Use Area Codes, some of Texas, some of Virginia.

The following TNs are members of this Privilege Group:

Name	Extension	DES	Equipment	Type
Bobby Morgan	2921	FL1J36	064 0 01 06	1120
Total number of members in this Privilege Group: 1				

Privilege Group 5

The members of this Privilege Group share the following parameters:

Class of Service: CTD

Network Class of Service (NCOS): 7

Facility Restriction Level (FRL): 7

Trunk Group Access Restriction (TGAR): 1

Below is a description of the calling privileges the members of this Privilege Group have:

Calling Abilities

Conditionally Toll-Denied - Allowed to originate and receive internal calls, and to receive calls from the exchange network. Unrestricted for toll calls placed through Basic/Network Alternate Route Selection (BARS/NARS), but toll-denied for calls placed via direct access to trunks.

Direct Access

The members of this Privilege Group can access the following Routes directly by dialing their access code:

Route	Type	Code
0	DID	2020
1	COT	2996
Number of directly accessible Routes: 2		

Calling Areas

The following Area Codes can be dialed by this Privilege Group through BARS/NARS:

200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 425, 426, 427, 428, 429, 431, 433, 434, 435, 436, 437, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 469, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 704, 705, 706, 707, 708, 709, 710, 712, 713, 714, 715, 716, 717, 718, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 948, 949, 950, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999

These Area Codes cover the following geographic region(s):

Northwest, Plain States, Alabama, Alaska, Alberta, Anguilla, Antigua, Arizona, Arkansas, Bahamas, Barbados, Bermuda, British Columbia, British Virgin Is, Cayman Is, Delaware, Dominica, Guam, Hawaii, High-Toll Area Codes, Illinois, Jamaica, Kentucky, Louisiana, Maine, Manitoba, Maryland, Massachusetts, Montserrat, Nevada, New Brunswick, New Hampshire, New Jersey, New Mexico, New York, Newfoundland, Non-Geographic Canadian Area Codes, North Carolina, Northern Mariana Is, Nova Scotia, Ohio, Oklahoma, Pennsylvania, Puerto Rico, Rhode Island, Saskatchewan, South Carolina, St. Kitts & Nevis, St. Lucia, St. Vincent, Tennessee, Toll-Free Area Codes, Trinidad & Tobago, Turks & Caicos Is, US Virgin Is, Utah, Vermont, Washington, Washington DC, West Virginia, Wisconsin, Wyoming, Yukon & NW Terr., some of California, some of Colorado, some of Connecticut, some of Dominican Republic, some of Florida, some of Georgia, some of Indiana, some of Michigan, some of Mississippi, some of Ontario, some of Oregon, some of Quebec, some of Special-Use Area Codes, some of Texas, some of Virginia.

The following TNs are members of this Privilege Group:

Name	Extension	DES	Equipment	Type
SoftPhone Experiment	4321	SFTPHO	064 0 03 31	2050PC
Total number of members in this Privilege Group: 1				

Privilege Group 6

The members of this Privilege Group share the following parameters:

Class of Service: UNR

Network Class of Service (NCOS): 0

Facility Restriction Level (FRL): 0

Trunk Group Access Restriction (TGAR): 0

Below is a description of the calling privileges the members of this Privilege Group have:

Calling Abilities

Unrestricted - Allowed to originate and receive internal calls, and calls to and from the exchange network.

Direct Access

The members of this Privilege Group can access the following Routes directly by dialing their access code:

Route	Type	Code
0	DID	2020
1	COT	2996
3	TIE	10106
112	TIE	80112
Number of directly accessible Routes: 4		

Calling Areas

The following Area Codes can be dialed by this Privilege Group through BARS/NARS:

201

These Area Codes cover the following geographic region(s):

Some of New Jersey.

The following TNs are members of this Privilege Group:

Name	Extension	DES	Equipment	Type

Privilege Group 9

The members of this Privilege Group share the following parameters:

Class of Service: UNR

Network Class of Service (NCOS): 7

Facility Restriction Level (FRL): 7

Trunk Group Access Restriction (TGAR): 1

Below is a description of the calling privileges the members of this Privilege Group have:

Calling Abilities

Unrestricted - Allowed to originate and receive internal calls, and calls to and from the exchange network.

Direct Access

The members of this Privilege Group can access the following Routes directly by dialing their access code:

Route	Type	Code
0	DID	2020
1	COT	2996
Number of directly accessible Routes: 2		

Calling Areas

The following Area Codes can be dialed by this Privilege Group through BARS/NARS:

200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 425, 426, 427, 428, 429, 431, 433, 434, 435, 436, 437, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 469, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 704, 705, 706, 707, 708, 709, 710, 712, 713, 714, 715, 716, 717, 718, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 948, 949, 950, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999

These Area Codes cover the following geographic region(s):

Northwest, Plain States, Alabama, Alaska, Alberta, Anguilla, Antigua, Arizona, Arkansas, Bahamas, Barbados, Bermuda, British Columbia, British Virgin Is, Cayman Is, Delaware, Dominica, Guam, Hawaii, High-Toll Area Codes, Illinois, Jamaica, Kentucky, Louisiana, Maine, Manitoba, Maryland, Massachusetts, Montserrat, Nevada, New Brunswick, New Hampshire, New Jersey, New Mexico, New York, Newfoundland, Non-Geographic Canadian Area Codes, North Carolina, Northern Mariana Is, Nova Scotia, Ohio, Oklahoma, Pennsylvania, Puerto Rico, Rhode Island, Saskatchewan, South Carolina, St. Kitts & Nevis, St. Lucia, St. Vincent, Tennessee, Toll-Free Area Codes, Trinidad & Tobago, Turks & Caicos Is, US Virgin Is, Utah, Vermont, Washington, Washington DC, West Virginia, Wisconsin, Wyoming, Yukon & NW Terr., some of California, some of Colorado, some of Connecticut, some of Dominican Republic, some of Florida, some of Georgia, some of Indiana, some of Michigan, some of Mississippi, some of Ontario, some of Oregon, some of Quebec, some of Special-Use Area Codes, some of Texas, some of Virginia.

The following TNs are members of this Privilege Group:

Name	Extension	DES	Equipment	Type
Nathaniel Moran	2905	FL1J03	008 0 07 00	2616

Name	Extension	DES	Equipment	Type
Total number of members in this Privilege Group: 1				

4. System Information

This section of the SourceBook addresses additional high-level topics related to system configuration including VoIP zones, Voicemail, and a graphical depiction of the Communication Server's hardware resources. The Action Items topic in this section is a summary of recommended actions to take to ensure efficient and accurate operation of your communications system.

4.1. Port Counts

For management purposes, it is often useful to have an inventory of all Port Types in your system. This information may be used for asset management and spares planning.

Format

This section groups the ports that are assigned to this customer by their type. The list for each port type is sorted in numerical order by primary extension number or TN if appropriate. For station types, we list the extension number of each set, its DES (usually indicating the station's location), and the equipment (TN). Directly below each table we indicate the total number of ports of that specific type.

Use

This information may be used to verify maintenance contracts and establish an inventory of system hardware.

4.2. IP Telephony Configuration

This section provides a high level view of the relationship between, and the configuration of, the key elements that support IP Telephony: the IP Telephony Node, the Call Server and the Media Gateway. The details provided outline both the physical IP layout and key aspects of the IP Telephony configuration from the perspective of the Call Server.

An IP Telephony Node is a logical grouping of Signaling Servers and Media Cards. IP Telephony Nodes play a central role in the configuration and administration of Voice over IP (VoIP) deployments. The purpose of an IP Telephony Node is to centralize the provisioning and management of key characteristics and resources of the group.

The IP Telephony Node works in conjunction with a Call Server and (for applicable systems) Media Gateways.

Format

This section provides key details for the system's IP Telephony Nodes, Call Servers and Media Gateways as visible from the Call Server's perspective.

Use

The insight into the system's IP Telephony Configuration this section provides serves as reference documentation of the system's Embedded LAN (ELAN). This information is essential for making informed engineering decisions with regard to repair and troubleshooting, resource allocation and distribution, as well as system redundancy and survivability.

Content Notice:

The IP Telephony Configuration section will not present entries for elements that are either not required for a system's configuration, or where the information for a given element may not be available from the Call Server (i.e. Co-Resident systems require Linux Base access for Call Server IP information). Information not present due to access issues can be made available for this section if access provisions are made. Contact your support representative to make these arrangements.

NOTE: CS 1000 Geographic Redundant systems do not provide access to all data residing on remote Call Servers. If access to all Geographically Redundant Call Servers was not provided, information such as part numbers for cards, Signaling Servers, other Call Servers, and Media Gateways may not be included or may be inferred from related data.

IP Telephony Nodes

For each IP Telephony Node, the Signaling Servers, Media Cards, and IP Media Services information is listed in addition to any Routes that may be configured to service the node. These tables allow you to understand the configuration of each IP Telephony Node including: the applications available within the node, the maximum and configured number of virtual trunks (VTRKs), and the Zone to which the virtual trunks are assigned. When the Node has IP Media Services configured, details about the Node's IP Tone and IP Ad Hoc Conferencing capabilities will be provided.

Common Telephony Node Applications

Acronym	Application Name	Acronym	Application Name
LTPS	Line Terminal Proxy Server	H323	H.323 Virtual Trunk
GK	GateKeeper	MC32S	32 port Voice Gateway Media Card
SIP	Session Initiated Protocol	SLG	SIP Line Gateway
VGW	Voice Gateway	VTRK	Virtual Trunk

Acronym	Application Name	Acronym	Application Name
IPCONF	IP Ad Hoc Conference	IPTONE	IP Tone
IPMUS	IP Music	IPANN	IP Recorded Announcements

Node: 1000

Servers and Media Cards for Node 1000

IP Address	Hostname	Server Type	Role	Max VTRKs	Applications
10.10.0.12	ss1.your_company.net	Nortel CPPMv1	Leader	2048	LTPS, VTRK
10.10.0.30	VGMC_BR1	MC32S	Follower		VGW
10.10.0.31	VGMC_BR2	SMC	Follower		VGW
Total servers in Node 1000: 3					

Route Summary for Node 1000

Route	Type	DES	Protocol	Zone	Direction	# VTRKs
112	TIE	SIP_ROUT	SIP	10	In and Out	24

Node: 1001

Servers and Media Cards for Node 1001

IP Address	Hostname	Server Type	Role	Max VTRKs	Applications
10.10.0.13	ss2.your_company.net	Nortel CPPMv1	Leader		LTPS
10.10.0.40	VGMC_BR3	MC32S	Follower		VGW
10.10.0.41	VGMC_BR4	SMC	Follower		VGW
Total servers in Node 1001: 3					

Call Servers

Call Servers provide call control and call features for the network. In the following table, the Active and Inactive Primary Call Servers are listed first, followed by any Secondary Call Servers. For each Call Server listed, its IP address, name and role (Active, Inactive, or Secondary) will be provided. Secondary Call Servers provide redundancy for a Primary Call Server. If this report was generated with data obtained from a Secondary Call Server, the Call Server can be both Active and have an alternate role as a Secondary Call Server.

IP	Name	Role	Alt Role
10.10.0.10	IP_ACTIVE	Active CS	
10.10.0.11	IP_INACTIVE	Inactive CS	
10.10.129.10	Piscataway	Secondary CS	
10.10.193.10	Albuquerque	Secondary CS	
Number of Call Servers: 4			

Media Gateways

A Media Gateway's primary role is to provide Digital Signal Processing (DSP) for IP and TDM communications. The following table outlines the configuration for each Media Gateway Controller (MGC). It provides IP and

Loop/Shelf addressing, as well as the bandwidth management Zone the MGC has been assigned to. If available, the MGC's name and the number of equipped DSP ports are also provided. If it can be determined which Media Gateways are local to the Call Server from which this report's data was obtained, a column indicating the results will be included.

IP	Loop Shelf	Name	Equipped DSP	Zone	Local to Active CS
10.10.0.20	004 0	HQ1	32	1	✓
10.10.0.21	008 0	HQ2	32	1	✓
Number of Media Gateways: 2					

4.3. IP Zones

Each Internet Protocol (IP) Terminal Number (TN) is assigned to a Zone. Zones are used for the primary purpose of selecting a codec. A zone can be configured to optimize for Best Quality (BQ) or Best Bandwidth (BB) for calls within a zone and all calls going out of a zone.

Format

This section is organized by zone number, including both stations and trunks in each zone.

Use

By configuring zones as Best Quality (BQ), more bandwidth will be used to allow better sound quality. By using Best Bandwidth (BB), some voice quality will be sacrificed, but the bandwidth usage will be significantly reduced.

There are two different types of calls to keep in mind when configuring zones. Interzone calls are all calls going out of the specified zone. Intrazone calls are all calls from two TNs in the same zone. Depending on the destination of an interzone call, you may decide to use a different zone strategy (BB vs. BQ) for interzone calls than intrazone calls.

Did You Know?

While this section of the SourceBook will tell you which stations and trunks belong to what zone, only the InfoPlus Traffic Study will help you determine each zone's ability to support the traffic presented to it. An annual review of both conventional TDM and newer IP traffic is one of the five components of prudent communications management. Call your salesperson to arrange for an InfoPlus Traffic Study to begin next week.

Zone: 000

Type: Shared

IntraZone Bandwidth: 100 Base-T

IntraZone Strategy: Best Bandwidth

InterZone Bandwidth: 100 Base-T

InterZone Strategy: Best Bandwidth

TNs assigned to this Zone:

4.4. Zone Based Dialing

The Zone Based Dialing (ZBD) feature is used to simplify the management of several local dialplans being collapsed into a single enterprise dialplan. This feature is especially useful when an enterprise consolidates multiple PBXs into one or a few centralized Call Servers. When this feature is enabled on the Call Server, every station needs to be assigned a Numbering Zone. Each Numbering Zone has parameters that alter the local dialing behavior and call flow for members of that zone. Numbering Zones can be used to define the particular Local Access Codes, Digit Manipulations, and Calling Line ID treatment for its members. Other extensions within the same Numbering Zone can be dialed using the length of the local dialplan, while calling members of a different Numbering Zone requires the use of an access or location code.

Format

This section contains the Global Parameters for Zone Based Dialing, followed by a listing of each Numbering Zone sorted numerically. The documentation of each Zone includes a listing of its particular access and dialing codes, tables of any applicable digit manipulation rules, and finally a directory of every station assigned to the Zone.

Use

The Zone Based Dialing section gives you a reference of how this particular Call Server is configured as part of your enterprise-wide dialing plan. Each Call Server in the network must have the feature enabled and configured consistently for proper operation. Review the parameters for each Zone to ensure they adhere to the design of the global dialplan, and that the digit manipulations being performed are correct. Improperly configured rules could result in call failures or misrouted calls. It's also important to note your 'Dialplan Designation for all Numbering Zones' - either Public or Private. If a Public format is used then the Calling Line ID will be displayed in the standard E.164 layout, otherwise a custom format is used. Finally, this section is useful to verify that each station is placed in the correct Numbering Zone, and identify any incorrect assignments.

Information about the configuration of Zone Based Dialing is not available for this System.

4.5. Voice Mail

For systems equipped with Voice Mail, this report lists those stations found with a VMA or MMA Class of Service, along with those stations' attributes.

Format

For each Voice Mail ACD Group, we identify the Voice Mail system type and list those extensions that provide the link between the Communication Server and the Voice Mail system ordered by extension number. We also note any CDNs pointed to each Voice Mail ACD Group along with their associated RAN and Music settings.

Use

Careful review of these reports will help safeguard your system from potential toll abuse through the Voice Mail system. Questions should be asked about increasing the Restriction Level of Voice Mail ports as well as denying CFXA capabilities.

Voice Mail ACD Group 3099

Voice Mail System Type: CallPilot

Voice Mail Ports

Extension	CLS	NCOS	TGAR	CFXA	Equipment

3105	UNR	0	1		004 0 09 05
Number of Voice Mail ports listed: 6					

Did You Know?

If you would like to see a thorough analysis of your CallPilot system including: user configuration and access, system resource consumption, hardware configuration, software configuration and more, contact your InfoPlus sales representative about ordering a Unified Messaging Survey for the CallPilot platform.

4.6. System Activity

The System Activity report provides an indication of the activity level of adds, moves and changes within your system over the last eighteen months. If this SourceBook is part of a subscription-based service, this topic will include additional tables detailing the TNs that were added, deleted, or modified since your previous SourceBook. These additional tables will not appear for the first iteration of a subscription, since there is no previous data available.

Format

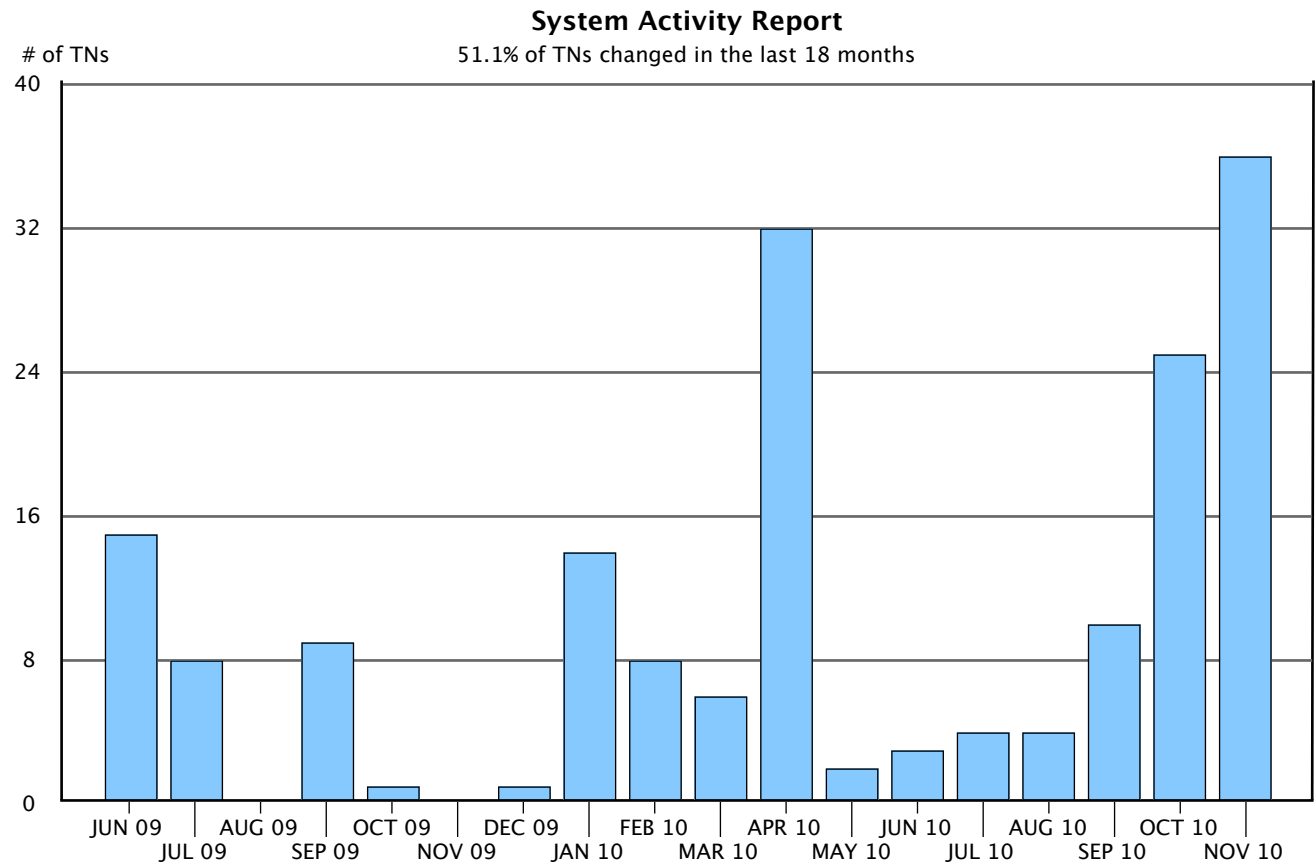

For the bar graph of System Activity, the left hand scale is the number of changes per month, and the bottom axis shows each month of the past eighteen months. The height of the bars indicate the number of stations which have a Service Date in the month indicated.

If previous SourceBook data is available for comparison, the additional tables for added, deleted, and modified TNs will be sorted by extension number and/or TN when appropriate. For each TN affected, we show the type and DES fields, as well as the primary extension and associated name if appropriate.

Use

This report may be used to justify previous telephone expense and activity, and as an aid in forecasting future budgets. However, the reported information may be an undercounting of actual activity. If a station was first changed in January, and then changed again in February, only the most recent activity will be reflected in the System Activity report.

The added, deleted, and modified TN tables also provide a log of changes for questions that may arise in the future. They help document the day-to-day activity of managing your Communication Server.

4.7. Equipment Lists

Meridian 1 and Communication Server 1000 systems are organized into groups of equipment called Loops. This section presents a listing of the ports associated with each Loop.

Format

This section is organized in Loop sequence, and the TNs in each Loop are sorted in equipment order (loop, shelf, card, unit).

Use

Careful review of these reports will safeguard your system and improve its efficiency. They should be reviewed to determine if any one Loop is serving an entire floor or department, or if there are unusual concentrations of trunking facilities within any one Loop. If concentrations are found, you may want a technician to redistribute these resources to minimize the impact of potential equipment failure.

Should you experience temporary Loop failure, you would consult this section to determine those facilities and/or individuals affected, and have your technician make temporary re-assignments if needed.

Loop: 4

Total number of ports in this Loop: 110				

Loop: 68

Equipment in this loop:

Name	Extension	DES	Equipment	Type
Phantom Forward	5527	FWD	068 0 01 00	500
Phantom Forward	5528	FWD	068 0 01 01	500
Phantom Forward	5529	FWD	068 0 01 02	500
Total number of ports in this Loop: 3				

4.8. Equipment Layout

Meridian 1 and Communication Server 1000 systems can contain both Common Equipment and Peripheral Equipment. Peripheral Equipment is organized into Loops. This section presents a graphic representation of the Common Equipment and each Peripheral Equipment Loop. It also provides a listing of Other Common Equipment such as communication ports and T-1 facilities.

Format

This section presents Common Equipment first, followed by Other Common Equipment and then Peripheral Equipment in Loop sequence. Within each shelf, the type of card installed in each slot is noted. For each Loop, the layouts also provide a visual indication of all ports that are assigned (red) and those that are spare (green), as well as the total number of ports on each card. Refer to the legend below for an explanation of the symbols used in the drawings.

Taken in its entirety, the Equipment Layouts are a 'bay face layout' of your telephone system as reported in the system software.

Use

Trunking facilities should also be reviewed to determine if there are unusual concentrations within any one Loop. If concentrations are found, you may want a technician to redistribute these resources so that failure of any one Loop will not adversely affect system performance.

The Equipment Layouts provide an approximation of traffic carried by each Loop. An ideal system would have the traffic carried by any one Loop within 100 CCS of the traffic carried by any other Loop.

NOTE: CS 1000 Geographic Redundant systems do not provide access to all data residing on remote Call Servers. If access to all Geographically Redundant Call Servers was not provided, information such as part numbers for cards, Signaling Servers, other Call Servers, and Media Gateways may not be included or may be inferred from related data.

Did You Know?

The manufacturer has ceased support for many of its older components and equipment, classifying them as 'End-of-Life'. If not addressed, service disruptions and increased maintenance costs could result. The InfoPlus Site Survey, with its included 'Manufacturer Support Analysis', specifically identifies which of your system's components may be affected by these policies. This analysis helps you and your vendor plan migration strategies that prolong system life while maximizing your return on investment.

Common Equipment

Common Equipment maps are not available or not applicable for this type of Communication Server.

Other Common Equipment

The following report lists other Common Equipment devices as they are configured in the Communication Server. The physical equipment which enables these devices is located in the Common Equipment shelves previously shown. However, the precise location of such equipment (which card slot is occupied) cannot be determined from the Communication Server data. Thus, the following equipment is resident in the empty slots of the CE shelves shown. (NOTE: CE Shelves are not shown for older SL-1 based PBXs or heritage Nortel 'small' systems.)

The Density of each card type is set by the technician, and therefore may or may not accurately represent the density of the card. This information is provided to assist in determining the number of physical cards present. An I/O device whose Reports Output column is preceded by an "*" is the System Monitor for the Communication Server.

Module/Slot	Device	Card Type	Density	DES	Reports Output
/	TTY 0				MTC SCH BUG
/	TTY 1				MTC SCH BUG
/	TTY 2				MTC SCH BUG
/	TTY 13			PTY	SCH
/	TTY 14			PTY	MTC SCH BUG
/	DCH 5	TMDI		PRI11	
/	T-1	PRI			

Peripheral Equipment

Legend

Ports

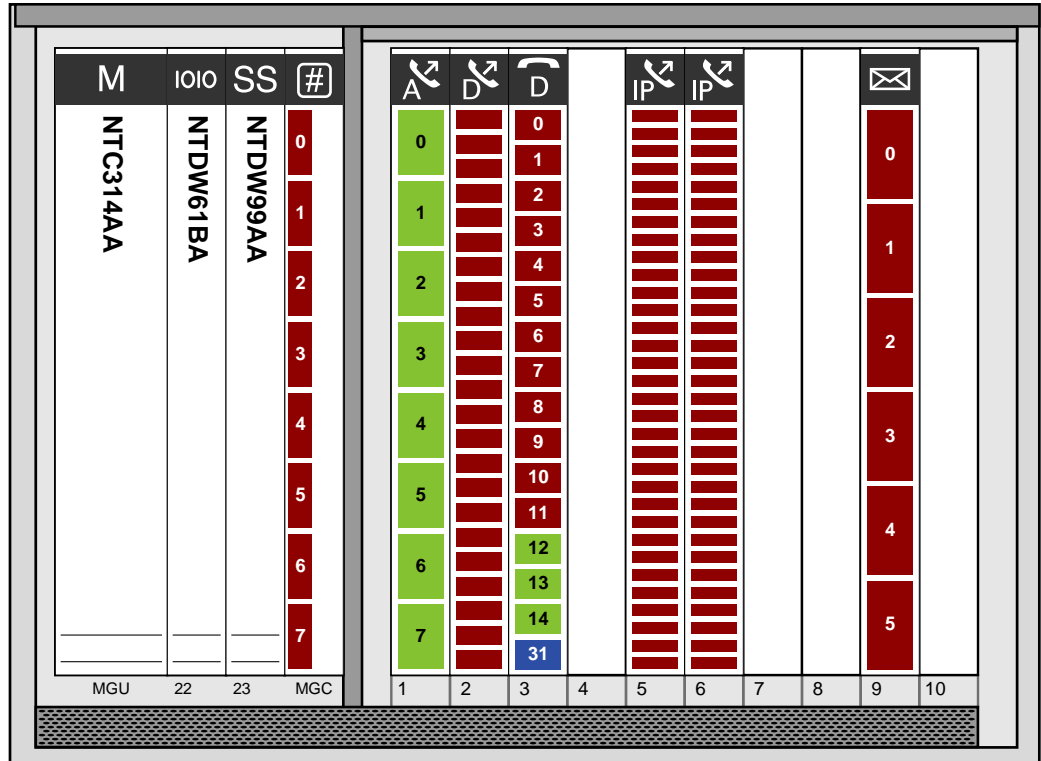

- 1 Used - Red
- 2 Spare - Green
- 3 Data - Blue
- 4 Unavailable - Gray

Card Types:

CPU	DTR	Digital Line	Digital Trunk
Signaling Server	Voicemail	Analog Line	Analog Trunk
Controller	Announcement	IP Line	IP Trunk
Disk Storage	Integrated Services	Data Line	Miscellaneous

MG 1010E 3 - Loop 004 Shelf 0

MGC IP: 10.10.0.20

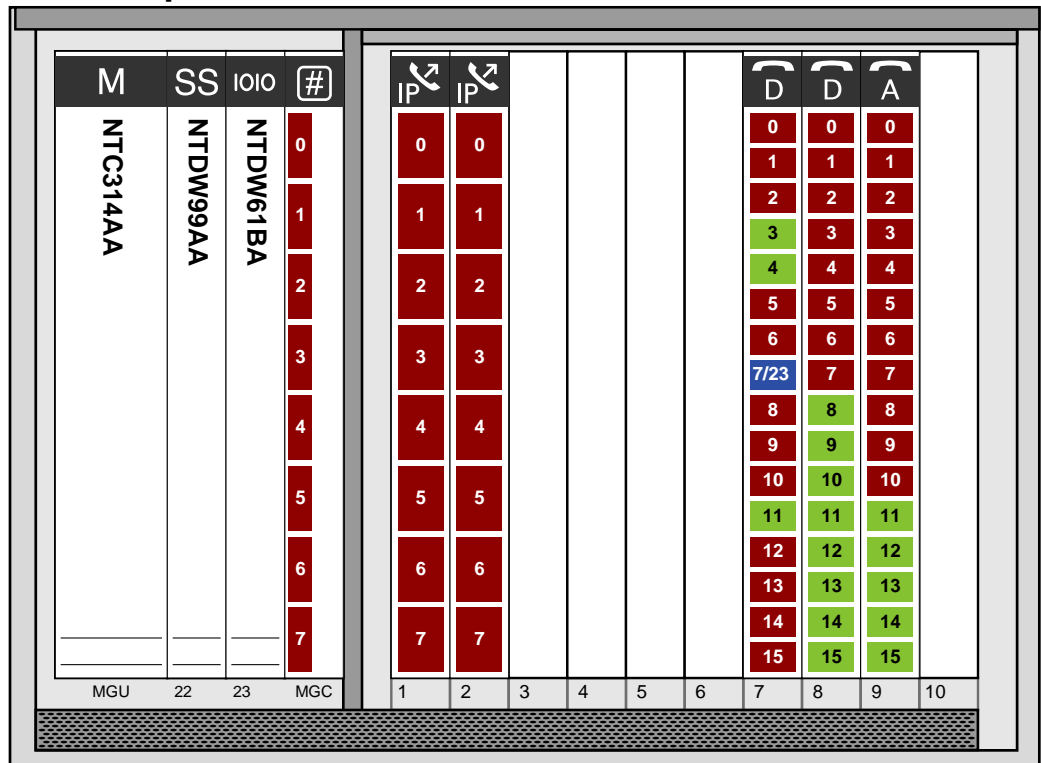

NTC310 Media Gateway

DSP Ports: 64 Loop Traffic: 1998 CCS

MG 1010E 5 - Loop 008 Shelf 0

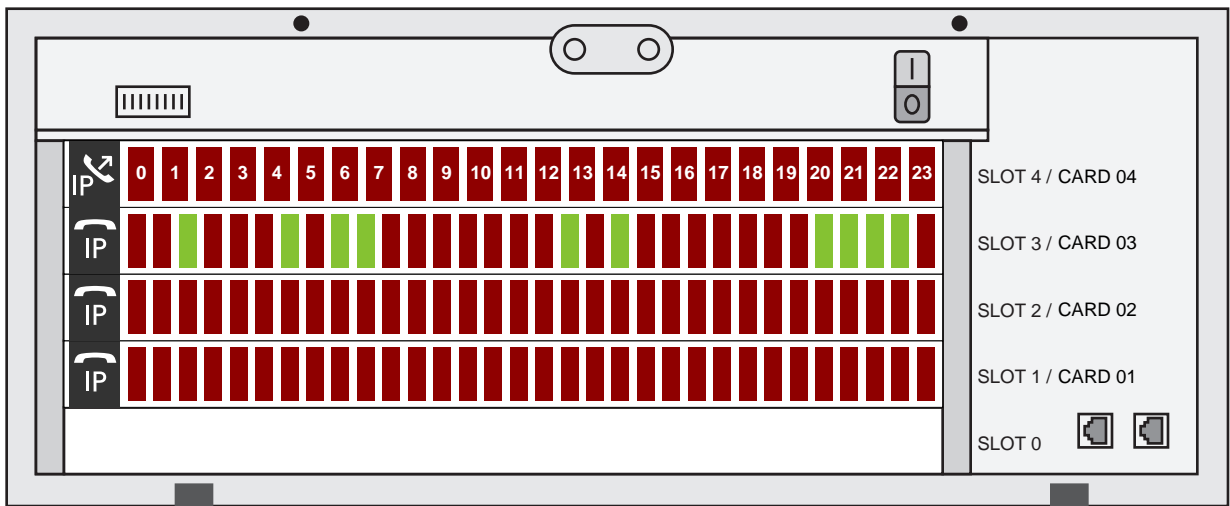

MGC IP: 10.10.0.21

NTC310 Media Gateway

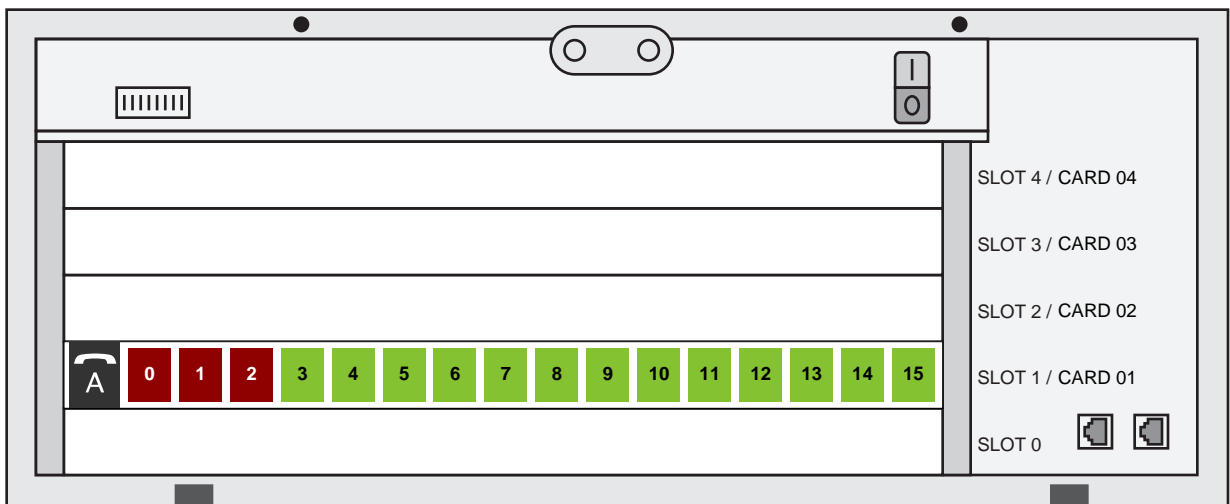

DSP Ports: 48 Loop Traffic: 432 CCS

Virtual MG 1000E - Loop 064 Shelf 0

Virtual MG 1000E

Phantom MG 1000E - Loop 068 Shelf 0

Phantom MG 1000E

4.9. Action Items

The Action Items are divided into two major categories: software items that are service affecting and software items that are clean-up issues.

Format

The first category lists potentially service-affecting issues found in your system, consisting of Area Codes not programmed in BARS, trunks forwarded to extensions not found in the system, and stations which Hunt or Forward to extensions not found in your system.

The second category lists clean-up issues that should be addressed for the best possible service. These issues include Call Pickup and Intercom Groups with only one station assigned, Vacant Routes, Circuit ID information, and Unused Speed Call Lists.

Use

Addressing these issues now will lead to better service, fewer user complaints, a better utilization of system resources, and an easier system to manage.

Subscriptions to the SourceBook will help ensure continued good service by performing these evaluations on a regular basis.

Service Affecting Action Items

The following may be service-affecting issues in the programming of the Communication Server:

Emergency Services (911/E911) Programming

The Emergency Services Access (ESA) programming for your system does not meet minimum configuration guidelines. It is recommended that you review the ESA programming to make sure that all possible ways to dial 911 are being handled appropriately through the ESA feature. Make sure that your ESDNs are configured, and that you have accounted for users attempting to dial 911 through BARS/NARS. All 911 calls should be handled by ESA to receive the special treatment and routing that it provides. Without this precaution, emergency calls could fail to complete under certain circumstances.

Proper handling of Emergency Services calls (911) may be dictated by legislation, and should be carefully configured to limit legal liabilities.

Unassigned Area Codes

The following North American Area Codes are not provided for in the Long Distance Routing Lists:

226, 325, 424, 430, 432, 438, 456, 458, 463, 470, 473, 475, 684, 703, 754, 769, 829, 947, 951

These Area Codes cover the following geographic region(s):

American Samoa, Grenada, some of California, some of Connecticut, some of Dominican Republic, some of Florida, some of Georgia, some of Indiana, some of Michigan, some of Mississippi, some of Ontario, some of Oregon, some of Quebec, some of Special-Use Area Codes, some of Texas, some of Virginia.

Misassigned Private Lines

There are no trunks configured for Private Line service.

Hunts & Forwards

The following stations Hunt to extension numbers without an appearance:

Extension	Hunts To
2815	2000
2865	2000
2903	7000
2912	7000
2921	1600
2945	2000
5505	2800
5530	2800
5560	2800
# of misassigned HUNTS: 9	

The following stations Forward to extension numbers without an appearance:

Extension	Forwards To
2815	2000
2865	2000
2903	7000
2912	7000
2921	1600
2945	2000
5505	2800
5530	2800
5560	2800
# of misassigned FDNs: 9	

Clean Up Action Items

The following are clean-up issues in the programming of the Communication Server:

Call Pickup Groups

The following Call Pickup Groups have only one station associated with them: 5, 66

These Call Pickup Groups should be removed if they are not being used.

Dial Intercom Groups

The following Dial Intercom Groups have only one station associated with them: 3, 5

These Dial Intercom Groups should be removed if they are not being used.

Vacant Routes

The following Routes are defined in the Route Data Block, yet have no Trunks assigned to them: 1

These Routes should be removed if they are not being used.

Incorrect Card Density

Card number 008 0 01 seems to have been programmed with an incorrect density of 8.

Route Lists

The following Route List entries point to nonexistent Routes:

Route List	Entry	Route
3	0	5
Number of routes: 1		

The following Route List entries point to Routes without trunks:

Route List	Entry	Route
4	0	1
Number of routes: 1		

Alternate Appearance DN's

The following AADNs point to extension numbers without an appearance:

TN	AADN
008 0 07 12	2500
# of misassigned AADNs: 1	

Circuit IDs

This system has identifications for some or all of its trunks. You may wish to check this information in the Routes section for completeness and accuracy.

Unused Speed Call Lists

The following Speed Call Lists are defined in your Communication Server software, but are not being used by any station: 0001, 0010, 0020, 0030

Removing these unused lists will free up system memory for other purposes.

Glossary

Access Code (ACOD)

A numerical value in the programming of each route that when dialed can access the trunks in that route directly.

Automatic Call Distribution (ACD)

A single number that may be dialed to present calls to multiple sets known as ACD Agents.

Call Detail Recording (CDR)

A feature allowing the recording of information about selected calls for accounting purposes.

Call Pickup Groups

A collection of sets that are able to answer calls made to any set within the same group.

CFXA

A class of service (CLS) allowing calls to be forwarded off-premise. (Call Forward External Allowed)

CLS

Assignments that determine the calling options and features available to the telephone.

Codec

An algorithm that encodes and decodes a data stream for transmission over a network or storage to persistent media. In the encoding and decoding process, data compression/decompression techniques can be applied to reduce the apparent amount of data transported by the network or stored.

Common Equipment

The section of the Communication Server housing cards not associated with sets or lines, i.e. CPU, Memory, Software, and Storage devices.

Control Directory Numbers (CDNs)

Special DNs to be used with the Enhanced ACD Routing (EAR) feature to add alternate RAN and Music treatments to an ACD queue.

Dial Intercom Group

A collection of sets that have the ability to call each other by using 1 or 2-digit dialing.

Digital Signal Processor (DSP)

Hardware in the Communication Server that is responsible for translating between IP-based and non-IP-based (TDM) resources.

Directory Number (DN)

An extension assigned to a set. This information is stored in the Directory Number Block (DNB).

Embedded LAN (ELAN)

An isolated network that keeps critical telephony signaling between the Call Server and the other components separate from the media and data networks. This separation facilitates higher quality voice communications.

Facility Restriction Level (FRL)

An FRL is assigned to each NCOS. It determines the entries in a Route List (RLI) to which it has access. 0 is the most restrictive, 7 is the least restrictive and can access more entries.

H.323

H.323 is a specification that defines a set of protocols to provide audio-visual communication sessions on a packet switched network.

Internet Protocol (IP)

A widely adopted protocol for transmitting data across a packet switched network, including the Internet.

IP Telephony Node

A logical grouping of Voice Gateway Media Cards and Signaling Servers. IP Telephony Nodes provide organization to and management structure for IP telephony deployments.

Local Area Network (LAN)

A network that is internal to your organization. A LAN is viewed as a private resource with restricted access.

Loop

An assignment of 30 usable timeslots for call traffic.

MARP

Multiple Appearance DN Redirection Prime - MARP is an attribute of DN appearances that affects call redirection features (e.g. CFW). Each DN can only appear 'MARPed' on a single TN. Other appearances of that DN are therefore unMARPed. The TN on which a DN is MARPed is the TN whose call redirection programming takes precedence when there is an ambiguity or conflict.

MMA

A Class of Service (CLS) used for Call Pilot Voicemail ports. (Multimedia Allowed)

Network Class of Service (NCOS)

A numerical value representing an individual restriction level assignment for sets and trunks. Each NCOS corresponds to a Facility Restriction Level (FRL).

Peripheral Equipment

The section of the Communication Server housing cards directly associated with sets and lines, i.e. Digital Line Cards, Universal Trunk Cards, and Voicemail.

Prime DN (PDN)

The DN assigned to Key 0 of a digital set, or the DN of an analog set.

Privilege Group

A collection of sets with identical calling abilities.

Route

A grouping of similar Trunks performing an identical purpose. For example, all DID Trunks for the main telephone number would be part of a single Route.

Route List

A definition of the Routes to be used when calling specific Area Codes, as well as the Network Classes of Service (NCOS) that may have access to the Routes.

Session Initiation Protocol (SIP)

SIP defines a set of protocols to provide call setup, tear down, and modification for multimedia communication sessions on an IP network.

Set Type

A field in the programming of each station designating a specific model of terminal equipment.

Special Prefix Number (SPRE)

The DN that can be used by any station with MTA as a Class of Service (CLS) to log into the Communication Server and perform certain maintenance functions.

Station Designator (DES)

A free-form field in the programming of each set often used for location or identification purposes.

Station Speed Call

A feature providing station users the ability to dial frequently called telephone numbers using a 1 to 3-digit code.

Superloop

A grouping of four loops, totaling 120 usable timeslots for call traffic.

System Speed Call

A feature providing station users access to a system-level list allowing them to dial frequently called telephone numbers using a 1 to 3-digit code. System Speed Call also overrides any restrictions placed on an extension.

Telephony LAN (TLAN)

An isolated LAN that carries telephony, voice, and signaling traffic and connects to the customer LAN.

Terminal Number (TN)

A number corresponding to a specific port in the Communication Server. Every trunk, set, and voicemail port has an individual TN.

Toll Abuse

The action of making unauthorized billable calls through a Communication Server.

Trunk

A voice and/or data channel between two telecommunications facilities. Trunks connect a private Communication Server to the public telephone network or other private facilities.

Trunk Access Restriction Group (TARG)

A list of TGAR values which are denied access to a given route.

Trunk Group Access Restriction (TGAR)

A numerical value that controls access to the exchange network, TIE trunks, CCSA trunks, and paging and dictation services. TGAR is checked against the TARG of a route. If the two numbers match, the call is denied.

Trunk ID (TKID)

A user-defined field in the programming of a trunk's TN. First appeared in Release 19 Software.

Virtual Trunk (VTRK)

A software trunk that serves as the bridge between call processing features and the IP network. Unlike a traditional TDM or analog trunk, virtual trunks are routed over an IP network rather than dedicated telecommunications facilities.

VMA

A Class Of Service (CLS) used for Meridian Mail Voicemail ports. (Server Voice Messaging Allowed)

Voice over IP (VoIP)

The transmission of voice communications over IP networks. Speech is encoded into IP packets using a codec, and transmitted over an IP network instead of a conventional, dedicated telecommunications network. The IP network may simultaneously be carrying non-voice data as well, resulting in a Converged Network.
